SUMMARY

Product Manager with experience balancing technical complexity, business outcomes, and cross-functional collaboration. Focused on accelerating delivery and improving key metrics (revenue, adoption, performance) through data-informed discovery and execution.

EXPERIENCE

Qubika / Ontic — Senior Product Manager

Mar/2026 – now

Responsibilities:

- Product Manager for the Integrations Squad, owning the API and Native Integration Products roadmap
- Help customer-facing teams clarify integrations requirements and build solutions using Ontic's integration portfolio

Results / Impact:

- Delivered

Cobli — Senior Product Manager

Jul/2024– Jan/2026

Responsibilities:

- Defined product vision and strategy for Cobli Cam (video telematics – hardware + SaaS).
- Led roadmap planning and execution for the Business Unit, managing 4 cross-functional squads.
- Mentored and developed 2 Product Managers.
- Led AI-driven initiatives applying Computer Vision and behavioral analytics.

Results / Impact:

- Improved video request user journey, reducing UX friction by 40%.
- Contributed to a +20% increase in sales conversion by prioritizing and launching important features requested from Voice of Customer such as livestream, camera obstruction detection, facial recognition, and risky behavior detection
- Improved AI-powered safety events detection (drowsiness, distraction, unsafe driving, seatbelt use) reducing false positive events by 70%.
- Contributed to churn mitigation and upsell initiatives increasing MRR retention in 2p.p.

OLX Brasil — Senior Product Manager

Feb/2021 – Jun/2024

Responsibilities:

- Defined and delivered an internal platform to enable backend and frontend customization through APIs, increasing delivery velocity across all squads in the company.
- Participated on VivaReal / ZAP platform merge, helping integration and data reliability issues.
- Managed B2B subscription products within the Automotive vertical
- Product Manager for the mobile squad, delivering app development platform and best practices for world-class iOS and Android apps.

Results / Impact:

- Reduced technical dependencies via platforms, decreasing time-to-deploy new use cases by up to 80%.
- Improved subscription products focused on lead generation, increasing MRR by 20% and lead generation by 18%.
- Reduced ZAP <> OLX data inconsistency by 95%

RD Station — Senior Product Manager

Jan/2016 – Jan/2021

Responsibilities:

- Acted as product manager for the reporting and analytics squad.
- Built the first integrated product vision and roadmap for that product.
- Mentored junior Product Managers.
- Contributed to strategic evaluation of M&A-related projects.
- Led performance and usability improvement initiatives.

Results / Impact:

- Reduced p90query latency by 90% (from 35s to 3s), significantly enhancing user experience.
- Increased customer satisfaction with reporting and analytics functionalities by +50%
- Increased feature usage via experiments (up to +30% MAU), a highly churn-correlated metric
- Structured and supported development of a new website tracking feature, reaching estimated 99% precision on web analytics metrics (pageviews, sessions, users)
